

NYC Site Safety Manager

Safety related construction accidents result in tremendous losses through civil suits, lost time and productivity. Problems arise when one construction manager is responsible for both production and safety. The tasks are too complex and too diverse to be handled effectively by the same person. Site Safety is as important to the bottom line as any other aspect of construction. Safety must be as professionally and efficiently handled as materials.

Recognizing and correcting physical hazards and managing Site Safety.

GEA's strength lies in our ability to provide a full range of site safety and related services. Our services include:

- Construction Site Safety Managers
- Licensed Professional Engineers
- NYC Dept. of Buildings Site Safety Plans
- NYC Dept. of Buildings Site Safety programs
- Local Law 11 Inspections
- Fireguard
- Code Consulting
- Violation removals
- New York City Licensed Site Safety Managers
